### Automotive Solution Overview

To be successful in the new economy your automotive supply company needs to be lean and flexible in order to drive demand and keep costs down. You need to create operational transparency so that you can react quickly to change while sharing the information that supports your entire supply chain concurrently with meeting the needs of the OEM.

At mcaConnect, we understand the enormous pressures facing suppliers to major automotive companies today, and are experienced at helping companies like yours know which technologies and business processes will help you get ahead and stay ahead of your competition. We work with medium and large size automotive suppliers by combining powerful technology with expert services to provide our automotive supply clients with a foundation for business improvement and growth.

Our consultants take the time to analyze your business requirements and match them to an industry standard solution from Microsoft Dynamics™ AX. We then apply specific functionality to help you enable smooth operational management, streamline your supply chain, and gain real time financial and sales visibility.

### Microsoft Dynamics AX for Automotive Offers:

- Supply and Demand Chain Transparency
- Multiple Release Accounting Styles
- Real Time Production Scheduling
- Operational Efficiency Improvements
- Global Design Team Support
- Start To Finish Process Control
- Lean manufacturing capabilities
- Contract and supplier management
